GTI Barrier Cable System Bare and Encapsulated Barrel Anchors

INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE

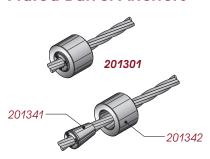

Fixed-End and Stressing-End Anchorages for Barrier Cables

- Flexible configuration: connects to an angle/tube steel that is attached to concrete column/wall or to a plate/washer on the outside of concrete column.
- Durable: zinc-plated barrels and wedges can be exposed or encapsulated.
- Attractive: encapsulation caps come in concrete grey custom cap colors are available by special order.

GTI Barrier Cable System In-Line Fixed-End Anchorage Group

Internationally Recognized Technically Advanced Innovative Products

INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE

Fixed-End Anchorage assembly for end anchorages at concrete columns/walls, either contained within the column/wall or exposed on column's exterior.

- In-line assembly accommodates up 11 barrier cables.
- Encapsulated Barrel Anchors with Spring-Loaded Wedges eliminates the need for backstressing.
- A special plate with holes machined at 4" centers provides code specified alignment and spacing of barrier cables.
- A special angled assembly is available for ramps and special details that can accommodate up to a 6-degree offset.

- 201345

GTI Barrier Cable System In-Line Stressing-End Anchorage Group

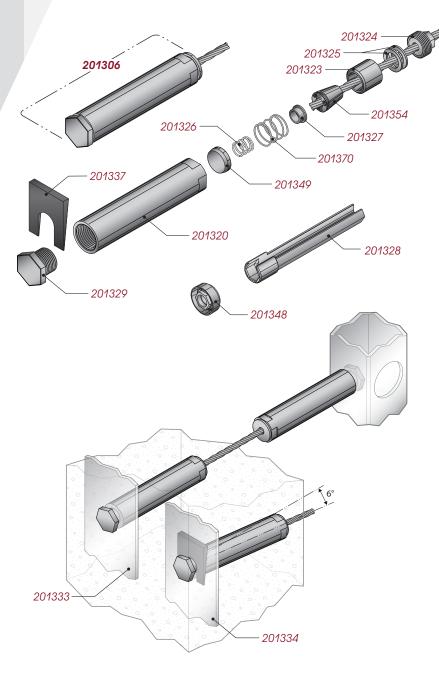

Internationally Recognized Technically Advanced Innovative Products

INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE

Stressing-End Anchorage assembly for end anchorages either contained within concrete columns/walls or attached to a steel member on the exterior of the column/wall that does not allow normal stressing.

- Coupler can tension or remove the slack from the barrier cables when ends are inaccessible.
- In-line assembly accommodates up to 11 barrier cables.
- A special plate with holes machined at 4" centers provides code specified alignment and spacing of barrier cables.

 A special angled assembly is available for ramps and special details that can accommodate up to a 6-degree offset.

GTI Barrier Cable System GRABB-IT® Splice

Internationally Recognized
Technically Advanced
Innovative Products

INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE

Floating GRABB-IT® Splice assembly designed to connect ends of two strands/barrier cables together

- Creates a continuous barrier cable between columns/support points.
- Splice can tension or remove the slack from the barrier cables when ends are inaccessible.
- Splice can be used for connecting strand ends in repair projects.

GTI Barrier Cable System

Internationally Recognized Technically Advanced Innovative Products

INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE & INNOVATION & RELIABILITY & QUALITY & PERFORMANCE

GTI offers the most advanced Barrier Cable Systems available for use in vehicle and pedestrian barriers, such as parking structures. The GTI Barrier Cable Systems can be used through columns or external to columns and consists of a multiple anchorages allowing a complete barrier cable system with a variety of optional anchorage configurations.

The GTI BCS product line is the first and only system that enables the use of encapsulations and shop prefabrication giving our customers the freedom to work in the most effective manner possible.

GTI BCS products provide standard or encapsulated coated barrel anchors, a barrier cable system that can be contained within a column or exposed on the column's exterior, and a floating intermediate tension coupler when barrier strand ends are inaccessible.

Standard exposed components are zinc-coated for extra corrosion protection for the exposed system. The GTI BCS product line is available in several strand sizes, including 1/2", 7/16" and 3/8".

GTI GRABB-IT® products provide a reliable, proven system for barrier cables. The GTI **GRABB-IT®** product line reduces installation time significantly at sites.

Both product lines are in compliance with industry codes while offering custom solutions to end-users. Testing confirms that GTI Barrier Cable Systems meet ACI and PTI Requirements for post-tensioning anchors. The systems are easy to use and installer friendly.
